The Secretary of State makes these Regulations in exercise of the powers in sections 16(1), (1A), (2), (3), (4), (5), (5A) and 36 of the Plant Varieties and Seeds Act 1964⁽¹⁾, after consultation in accordance with section 16(1) of that Act with representatives of such interests as appear to be concerned, and in exercise of the powers in paragraph 1A of Schedule 2 to the European Communities Act 1972⁽²⁾.

These Regulations make provision for a purpose mentioned in section 2(2) of the European Communities Act 1972 and it appears to the Secretary of State that it is expedient for the references in these Regulations to the Directives specified in regulation 3(2) to be construed as references to those Directives as amended from time to time.

See section 38(1) for the definition of “the Minister”. Under S.I. 2002/794 the functions of the Minister of Agriculture, Fisheries and Food under the Plant Varieties and Seeds Act 1964 which remained vested in that Minister were transferred to the Secretary of State.

PART 2

Categories of seed

Seed to which these Regulations apply

4.—(1) These Regulations apply in relation to seed of the plants in the first column of the table in Schedule 1 intended to be used for agricultural or horticultural production, but do not apply in relation to seed intended to be used for ornamental plants.

(2) They do not apply in relation to seed intended for export outside the European Union (other than regulation 26 which relates to certification for export).

Categories of seed

5. Seed is divided into the following categories, commonly known by the abbreviations given—
- (a) breeder’s seed (“BR”);
 - (b) pre-basic seed (“PB”);
 - (c) basic seed (“BS”);
 - (d) certified seed (“CS”);
 - (e) certified seed, first generation (“C1”);
 - (f) certified seed, second generation (“C2”);
 - (g) certified seed, third generation (“C3”);
 - (h) commercial seed (“CM”);
 - (i) standard seed (vegetables only) (“ST”);
 - (j) seed of a higher voluntary standard (“HVS”).

Breeder’s seed

6. Breeder’s seed is seed produced by or under the responsibility of the breeder and intended for the production of pre-basic seed or basic seed.

Status: Point in time view as at 01/04/2017.

Changes to legislation: There are currently no known outstanding effects for the The Seed Marketing Regulations 2011. (See end of Document for details)

Maintainers for pre-basic and basic seed

7. Pre-basic seed and basic seed may only be produced with the written authorisation of the person listed as the maintainer of that seed in the United Kingdom National List or the Common Catalogue.

PART 3

Marketing seed

Marketing seed

8. Seed to which these Regulations apply may only be marketed as seed if it is—
- (a) certified under regulation 10 and 11 as being one of the categories in regulation 5;
 - (b) packaged and sealed in accordance with regulation 16;
 - (c) labelled in accordance with regulation 17;
 - (d) marketed by a person licensed to do so in accordance with regulation 20.

Exceptions

- 9.—(1) The requirement for certification does not apply in relation to breeder's seed.
(2) Schedule 4 makes provision for the marketing of seed not fully complying with regulation 8.

Overriding requirements: the building blocks necessary for certification

10. To be certified under these Regulations as one of the categories in regulation 5 seed must—
- (a) be a variety entered in the United Kingdom National List or the Common Catalogue;
 - (b) be grown from a seed eligible to produce that category in accordance with Schedule 2;
 - (c) come from a crop inspected under these Regulations and certified as complying with the requirements of Schedule 2;
 - (d) be tested in accordance with these Regulations.

Detailed requirements for certification

11.—(1) In order to be certified a sample of the seed from which the crop is going to be produced must be entered with the Secretary of State in sufficient time for the Secretary of State to grow a control plot.

(2) The Secretary of State may accept the entry of a sample of the seed after this time, but in this case the crop grown to produce the seed must be inspected by an official crop inspector in accordance with regulation 12.

(3) The crop used to produce the seed must be inspected by a crop inspector in accordance with the provisions relating to that crop in Schedule 2, and the crop inspector must certify that—

- (a) the crop meets the standard for that crop specified in Schedule 2, or
- (b) the crop meets a lower standard but still meets one of the standards in Schedule 2,

and lodge a report to that effect with the Secretary of State.

(4) The crop inspector may indicate that remedial action or further inspection is necessary before the crop is certified as meeting the required standard.

(5) Once the crop has been harvested and processed, a sample of the seed must be taken by a licensed seed sampler (using current international sampling methods in so far as they exist) in accordance with the provisions relating to that crop in Schedule 2 (for the avoidance of doubt the seed lot sizes and sample weights are specified in each of the Directives in that Schedule dealing with the seed).

(6) The seed must be tested in a seed testing station (either licensed or operated by the Secretary of State), which must test the seed (using current international sampling and testing methods in so far as they exist) to ensure that the certification standards in Schedule 2 are complied with and issue a seed test report stating the results and lodge the report with the Secretary of State.

Crop inspections

12. A crop inspection for certification must be carried out by a licensed crop inspector; except for the inspection of—

- (a) a crop intended for the production of pre-basic or basic seed, or
- (b) a crop producing seed when the entry of the seed under regulation 11 was too late to allow the Secretary of State to grow a control plot,

when the inspection must be carried out by an official crop inspector appointed by the Secretary of State for the purposes of such inspection.

Standard of seed at the time of marketing

13. At the time of marketing the seed must as a minimum comply with the standards in Schedule 2 relating to that type of seed.

Re-grading a crop or seed

14. For the avoidance of doubt, if a crop or seed has been certified as belonging to one category, but complies with the requirements of another category for that seed, it may be re-graded as any category for which it satisfies the requirements.

Control plots and tests

15.—(1) The Secretary of State must carry out any necessary tests on the entered seed, and in particular must grow the seed in a control plot.

(2) If the tests or the control plot meets the requirements for varietal identity and varietal purity no further action is taken.

(3) Otherwise the Secretary of State must obtain more information from crops grown from that seed and, if the Secretary of State decides that the crop is not satisfactory, notify the applicant that the crop may not be certified, or must be downgraded to a lower category.

Packaging and sealing

16.—(1) All seed, other than loose sales (for which see Part 5 of Schedule 3) must be supplied in a sealed package by a person licensed to do so under regulation 20.

(2) The packaged seed must be in homogeneous lots.

[^{F6}(3) A package must be sealed by or under the supervision of a licenced seed sampler using an official seal.]

(4) It must either have a non-re-useable sealing system or be sealed in such a manner that opening the package—

Status: Point in time view as at 01/04/2017.

Changes to legislation: There are currently no known outstanding effects for the The Seed Marketing Regulations 2011. (See end of Document for details)

- (a) damages the sealing system; or
- (b) leaves evidence of tampering on either the label or the package.

(5) If a package is opened other than by the final consumer it must be re-labelled and re-sealed by or under the supervision of a licensed seed sampler, and the fact of resealing, the most recent date of resealing and the authority responsible for it must be stated on the label.

(6) This regulation does not apply in relation to the marketing of small packages of seed as defined in Schedule 3.

17.—(1) All seed must be labelled in accordance with Schedule 3 by a person licensed to do so under regulation 20.

(2) No person may reproduce, remove, alter, deface, conceal or misuse in any way any label produced for the purposes of these Regulations.

Mixtures of seed

18. A mixture of seed may only be marketed if the mixture is permitted under the following table.

Permitted mixtures

<i>Column header</i>	<i>Beet</i>	<i>Cereals</i>	<i>Fodder</i>	<i>Oil and fibre</i>	<i>Vegetable</i>	<i>Seed outside the scope of these Regulations</i>

- (i) A mixture of varieties of one species of cereal seed is permitted only if it is effective against the propagation of a harmful organism. All the seed must comply with these Regulations before mixing.
- (ii) [F7A mixture of different varieties of standard seed of the same species must be marketed in a package containing not more than 5kg of seed (in the case of legumes), 500g of seed (in the case of asparagus, beetroot, carrot, chard or spinach beet, gourd, marrow, onion, radish, spinach or turnip) or 100g of seed (in the case of any other species)]

(3) Before licensing a seed testing station the Secretary of State must be satisfied that the station has adequate premises, qualified personnel and equipment to test for the purposes of these Regulations.
