

SCHEDULE 1

Regulation 9(1)(b)

Criteria for determining best available techniques

The criteria referred to in regulation 9(1)(b) for determining best available techniques are—

- (1) the use of low-waste technology;
- (2) the use of less hazardous substances;
- (3) the furthering of recovery and recycling of substances generated and used in the process and of waste, where appropriate;
- (4) comparable processes, facilities or methods of operation which have been tried with success on an industrial scale;
- (5) technological advances and changes in scientific knowledge and understanding;
- (6) the nature, effects and volume of the emissions concerned;
- (7) the commissioning dates for new or existing offshore combustion installations;
- (8) the length of time needed to introduce the best available technique;
- (9) the consumption and nature of raw materials (including water) used in the process and energy efficiency;
- (10) the need to prevent or reduce to a minimum the overall impact of the emissions on the environment and the risks to it;
- (11) the need to prevent accidents and to minimise the consequences for the environment; and
- (12) information published by public international organisations.

Changes to legislation:

There are currently no known outstanding effects for the The Offshore Combustion Installations (Pollution Prevention and Control) Regulations 2013, SCHEDULE 1.
