“(14) In this article—

“carbon dioxide equivalent saving” means, in respect of a measure, the amount in tonnes of carbon dioxide equivalent that is expected to be saved over the lifetime of the measure;

“international carbon reporting practice” has the meaning given by section 94(1) of the Climate Change Act 2008(7);

“relevant calendar month” means—

(5) The Government’s Reduced Data Standard Assessment Procedure for Energy Rating of Dwellings (2012 Edition, version 9.92) is at Appendix S of the document entitled “The Government’s Standard Assessment Procedure for the Energy Rating of Dwellings 2012 edition” which can be accessed at http://www.bre.co.uk/filelibrary/SAP/2012/SAP-2012_9-92.pdf. EXPLANATORY NOTE

(This note is not part of the Order)

This Order amends the Electricity and Gas (Energy Companies Obligation) Order 2012 ([S.I. 2012/3018](#)), as amended by [S.I. 2014/1131](#) (the “ECO Order”).

This Order enables the calculation of carbon savings and cost savings for qualifying actions installed under the ECO Order to be carried out using new versions of the Standard Assessment Procedure (“SAP”) and the Reduced Data Standard Assessment Procedure (“RdSAP”), as well as the 2009 versions of these methodologies which are already provided for in the ECO Order. Accordingly, it amends articles 16 and 17 of the ECO Order, which set out how carbon savings and cost savings are to be determined.

The new versions of SAP and RdSAP produce estimates of the amount of carbon dioxide equivalent that a measure will save. This is an estimate of the extent to which an energy efficiency measure is expected to reduce the global warming potential of methane and nitrous oxide, as well as carbon dioxide. Accordingly, article 4(1)(a) amends article 16(6) of the ECO Order to provide that the carbon dioxide equivalent saving determined under the new versions of SAP or RdSAP is to be multiplied by a conversion factor of 0.925 to convert it into an estimate of the extent to which the measure is expected to reduce carbon dioxide emissions.

This Order also amends article 18 of the ECO Order to provide that the Authority may only approve an alternative methodology for the determination of carbon or cost savings for a particular action if none of the 2009 or 2012 versions of SAP or RdSAP contain a methodology for determining those savings.
