2014 No. 3248

The Mines Regulations 2014

PART 3

CONTROL OF MAJOR HAZARDS

Shafts, outlets and winding

Signalling and communication

40. In any shaft or outlet in which there is winding apparatus or other equipment, the mine operator must ensure that there is provided suitable and safe means to communicate and signal, where such means of communication and signalling is necessary to enable the winding apparatus or equipment to be used safely.
