

## SCHEDULE 1

Principal elements of the safety objectives for electrical equipment designed for use within certain voltage limits

2. Protection against hazards arising from the electrical equipment
  - (a) Persons and domestic animals must be adequately protected against the danger of physical injury or other harm which might be caused by direct or indirect contact.
  - (b) Temperatures, arcs or radiation which would cause a danger, must not be produced.
  - (c) Persons, domestic animals and property must be adequately protected against non-electrical dangers caused by the electrical equipment which are revealed by experience.
  - (d) The insulation must be suitable for foreseeable conditions.
