2016 No. 507

The Tobacco and Related Products Regulations 2016

PART 3

Emissions, additives and other prohibited ingredients and products

Maximum emission levels of cigarettes

13.—(1) No person may produce, supply or manufacture for export any cigarettes with emission levels greater than—

- (a) 10 milligrams of tar per cigarette;
- (b) 1 milligram of nicotine per cigarette;
- (c) 10 milligrams of carbon monoxide per cigarette.

(2) For the purposes of this regulation and regulation 14, a person manufactures a product for export if, in the course of a business and other than with a view to the product being supplied for consumption in the United Kingdom or through the travel retail sector, the person—

- (a) manufactures the product; or
- (b) puts a name, trade mark or other distinguishing mark on it by which the person is held out to be its manufacturer or originator.
