**2019 No. 421**

**The Alternative Fuel Labelling and Greenhouse Gas Emissions (Miscellaneous Amendments) Regulations 2019**

**PART 2**

**Fuel labelling**

**Fuel labelling: relevant vehicles**

5.—(1) A motor vehicle manufacturer must ensure that—

- (a) each relevant vehicle manufactured by it is labelled in accordance with paragraph (2),
- (b) the user manual of each such relevant vehicle contains information in accordance with paragraph (3).

(2) The identifier (and in the case of a relevant vehicle that can use more than one fuel type, all the relevant identifiers) must be affixed in the immediate proximity of the relevant vehicle fuel filler cap or filler flap, in a position giving the user of the vehicle a clear one-to-one relation between fuel and vehicle, in a durable and easy to read position.

(3) The identifier (and in the case of a relevant vehicle that can use more than one fuel type, all the relevant identifiers), indicating the fuel type that the vehicle can use, must be included in the user manual in a way that is easy to obtain and understand by the user of the vehicle.
