[^{F127} Definition of interception and monitoring services U.K.]

21A.—(1) For the purposes of this Part, “interception and monitoring services” means any service that has as its object or effect the interception of a communication in the course of its transmission by means of a telecommunication system.

(2) A person intercepts a communication in the course of its transmission by means of a telecommunication system if, and only if—

- (a) the person does a relevant act in relation to the system; and
- (b) the effect of the relevant act is to make any content of the communication available, at a relevant time, to a person who is not the sender or intended recipient of the communication.

(3) In paragraph (2) a “relevant act”, in relation to a telecommunication system, means—

- (a) modifying, or interfering with, the system or its operation;
- (b) monitoring transmissions made by means of the system;
- (c) monitoring transmissions made by wireless telegraphy to or from apparatus that is part of the system.

(4) In paragraph (2), a “relevant time”, in relation to a communication transmitted by means of a telecommunication system, means—

- (a) any time while the communication is being transmitted; and
- (b) any time when the communication is stored in or by the system (whether before or after its transmission).

(5) For the purpose of paragraph (2), the cases in which any content of a communication is to be taken to be made available to a person at a relevant time include any case in which any of the communication is diverted or recorded at a relevant time so as to make the content of the communication available to a person after that time.

(6) In paragraph (3), references to modifying a telecommunication system include references to attaching any apparatus to, or otherwise modifying or interfering with—

- (a) any part of the system; or
- (b) any wireless telegraphy apparatus used for making transmissions to or from apparatus that is part of the system.

(7) For the purposes of this regulation, the following definitions also apply—

“apparatus” includes any equipment, machinery or device (whether physical or logical) and any wire or cable;

“communication”, for the purpose of a telecommunication system, includes—

- (a) anything comprising speech, music, sounds, visual images or data of any description; and
- (b) signals serving for the impartation of anything between persons, between a person and a thing or between things, for the actuation or control of any apparatus;

“content”, in relation to a communication and a telecommunication system, means any element of the communication, or any data attached to or logically associated with the communication, which reveals anything of what might reasonably be considered to be the meaning (if any) of the communication, but—

- (a) any meaning arising from the fact of the communication or from any data relating to the transmission of the communication is to be disregarded; and
- (b) anything which is systems data is not content;

“systems data” means any data that enables or facilitates, or identifies or describes anything connected with enabling or facilitating, the functioning of a telecommunication system (including any apparatus forming part of the system);

“a telecommunication system” means a system (including the apparatus comprised in it) that exists for the purpose of facilitating the transmission of communications by any means involving the use of electrical or electromagnetic energy;

“wireless telegraphy” and “wireless telegraphy apparatus” have the same meaning as in sections 116 and 117 of the Wireless Telegraphy Act 2006.]

Interpretation U.K.

1.—(1) A thing is specified in this Schedule if it is specified in Parts [^{F577}1A] to 8, and a reference in any note in this Schedule to a thing being “controlled” or subject to “controls” is to be read as a reference to it being specified.

(2) In this Schedule, defined terms are printed in quotation marks.

(3) Terms printed in quotation marks and not defined in this Schedule have the meaning given to them in—

- (a) Schedules 2 and 3 of the Export Control Order 2008, or
- (b) Annex I of the Dual-Use Regulation,

as applicable.

Textual Amendments

2.—(1) In this Schedule—

[^{F578}“controlled materials” means controlled energetic materials specified in 1C011, 1C111, 1C239 of Annex I of the Dual-Use Regulation and ML8 in Schedule 2 to the Export Control Order 2008;]

“dynamic adaptive routing” means automatic rerouting of traffic based on sensing and analysis of current actual network conditions, but does not include cases of routing decisions taken on predefined information;

“fluoride fibres” means fibres manufactured from bulk fluoride compounds;

“hybrid computer” means equipment that can—

- (a) accept data,
- (b) process data, in both analogue and digital representation, and
- (c) provide output of data;

“media access unit” means equipment that contains one or more communication interfaces (“network access controller”, “communications channel controller”, modem or computer bus) to connect terminal equipment to a network;

“stored program controlled” means a control using instructions stored in an electronic storage that a processor can execute in order to direct the performance of predetermined functions,

and equipment may be “stored program controlled” whether the electronic storage is internal or external to the equipment;

“terminal interface equipment” means equipment at which information enters or leaves the telecommunication systems, for example a telephone, data device, computer, or facsimile device.

(2) For the purposes of this Schedule, the interpretative notes set out in Table 1 apply.

Table 1

Interpretative notes

“multi-data-stream processing” refers to the “microprogram” or equipment architecture technique that permits simultaneous processing of two or more data sequences under the control of one or more instruction sequences by means such as:

Single Instruction Multiple Data (SIMD) architectures such as vector or array processors;

Multiple Single Instruction Multiple Data (MSIMD) architectures;

Multiple Instruction Multiple Data (MIMD) architectures, including those that are tightly coupled, closely coupled or loosely coupled;

structured arrays of processing elements, including systolic arrays.

“data signalling rate” means the rate, as defined in International Telecommunications Union Recommendation 53-36, taking into account that, for non-binary modulation, baud and bit per second are not equal.

Bits for coding, checking and synchronization functions are to be included.

When determining the “data signalling rate”, servicing and administrative channels shall be excluded.

It is the maximum one-way rate, i.e., the maximum rate in either transmission or reception.

“spectral efficiency” is a figure of merit parametrized to characterize the efficiency of transmission system that uses complex modulation schemes such as QAM (quadrature amplitude modulation), Trellis coding, QSPK (Q-phased shift key), etc.. It is defined as the Digital transfer rate (bits/second) divided by 6dB spectrum bandwidth (Hz).

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations are made under the Sanctions and Anti-Money Laundering Act 2018 (c.13) to establish a sanctions regime under that Act in relation to Russia. These Regulations are made for the purpose of encouraging Russia to cease actions destabilising Ukraine or undermining or threatening the territorial integrity, sovereignty or independence of Ukraine. Following the UK's withdrawal from the European Union, these Regulations will replace the EU sanctions regimes in relation to Russia. The EU sanctions regimes are currently implemented via EU Council Decisions and Regulations.

The Regulations confer a power on the Secretary of State to designate persons who are, or have been, involved in destabilising Ukraine or undermining or threatening the territorial integrity, sovereignty or independence of Ukraine. Designated persons may be excluded from the United Kingdom and may be made subject to financial sanctions, including having their funds or economic resources frozen.

These Regulations also impose restrictions on trade in military goods and technology, on certain dual-use and energy-related items, and impose restrictions on supplying infrastructure-related goods and technology to Crimea and on importing goods from Crimea. These Regulations also restrict the provision of services related to the trade in those items. The Regulations also restrict persons from dealing with certain financial instruments, restrict the provision of finance and funds, and restrict investment in relation to Crimea.

The Regulations provide for certain exceptions to this sanctions regime, including in relation to financial sanctions (for example to allow for frozen accounts to be credited with interest or other earnings), trade sanctions and also acts done for the purpose of national security or the prevention of serious crime. The Regulations also confer powers on the Secretary of State and the Treasury to issue licences in respect of activities that would otherwise be prohibited under the financial and trade sanctions imposed. Schedule 5 of these Regulations sets out the purposes pursuant to which the Treasury will issue such licences.

The Regulations make it a criminal offence to contravene, or circumvent, any of the prohibitions in these Regulations and prescribe the mode of trial and penalties that apply to such offences.

The Regulations also confer powers on specified maritime enforcement officers to stop and search ships in international and foreign waters for the purpose of enforcing specified trade sanctions and to seize goods found on board ships which are being, or have been, dealt with in contravention, or deemed contravention, of those prohibitions. The Regulations prescribe powers for the provision and sharing of information to enable the effective implementation and enforcement of the sanctions regime.

The Regulations revoke the relevant EU Regulations relating to the existing EU Russia sanctions regimes, in so far as those Regulations would have had effect in the UK after exit day. The Regulations also revoke existing UK trade and financial sanctions regulations relating to the existing EU Russia sanctions regimes.
