or UNECE Regulation 134 for hydrogen.

In the case of a vehicle manufactured on or before 1st May 2009 the requirement in paragraph 5.9.1 for a tank cap to be fixed to the filler pipe does not apply.

4Rear Registration Plate Space

6Door latches and Hinges

1 All doors, provided on the vehicle for the entry and exit of occupants, must be designed so as to allow easy and safe use. Doors fitted to the side of the vehicle must have both intermediate and fully latched positions. However, latching in an intermediate position is not required if a safety-bolt with an audible warning device is provided as specified in the paragraph 2(b) below. Door latches must be designed to prevent the doors from opening accidentally.

For the purposes of this item, **“longitudinal plane”** means a vertical plane parallel to the longitudinal axis of a vehicle.

1 Column 1, paragraph 2 does not apply to doors which do not give direct access to a seat designed for normal use while a vehicle is travelling on a road. This includes any door, for which the **longitudinal plane** passing through the extreme inboard projecting point of such a door is more than 300mm distant from the **longitudinal plane** passing through the nearest edge of such a seat. For the purpose of this provision the seating position of a wheelchair is considered to be a seat.

2 Where hinges are used on doors fitted to the side of a vehicle, other than folding doors, the hinges must be fitted at the front edge of the door. However, they may be fitted at the top or rear edge if either—
(a) a device is fitted which automatically closes the door at least to the intermediate latched position if it is unlatched when

2 The latching requirements in paragraphs 1 and 3 do not apply to any power-operated door if the force applied by the power actuator is sufficient to keep the door completely closed even when any load is applied as described in paragraph 3.

the vehicle is moving in the forward direction, or
(b) a safety-bolt is fitted to prevent such unlatching and an audible or visual warning device is provided which activates an audible warning if the vehicle is driven without the bolt in place.

3 On hinged doors, the latch and striker assembly must be capable of withstanding any load which is likely to be applied in the course of normal driving (i.e. excluding crash impacts) in both the intermediate and fully latched positions. However if a safety-bolt with an audible warning device is provided as specified in paragraph 2(b) above, the requirement need be met only with the bolt in place.

3 This item does not apply to doors meeting the technical requirements specified in paragraphs 7.6.4 to 7.6.6 or in paragraph 7.6.7 of Annex I to Directive [2001/85/EC](#).

For the purposes of this item an “**audible warning device**” does not include a bell, gong or siren.

8 Indirect Vision
