
STATUTORY INSTRUMENTS

2021 No. 745

**The Ecodesign for Energy-Related Products
and Energy Information Regulations 2021**

PART 3

Energy Information

**ENERGY LABELLING OF REFRIGERATING
APPLIANCES WITH A DIRECT SALES FUNCTION**

Obligations of suppliers

46.—(1) Suppliers⁽¹⁾ must ensure that—

- (a) each refrigerating appliance with a direct sales function is supplied with a printed label in the format set out in Schedule 23;
- (b) the values of the parameters of the product information sheet, set out in Schedule 24, are available on a publicly accessible website;
- (c) if specifically requested by the dealer, the product information sheet is made available in printed form;
- (d) the content of the technical documentation, set out in Schedule 25, is made available for inspection in accordance with Article 4(2) of the Framework Regulation;
- (e) any visual advertisement for a specific model of a refrigerating appliance with a direct sales function contains on the label, in accordance with Schedule 26—
 - (i) the energy efficiency class of that model; and
 - (ii) the range of energy efficiency classes available;
- (f) any technical promotional material or other promotional material concerning a specific model of refrigerating appliance with a direct sales function, including technical promotional material or other promotional material on the internet, contains on the label, in accordance with Schedules 26 and 27—
 - (i) the energy efficiency class of that model; and
 - (ii) the range of energy efficiency classes available;
- (g) an electronic label in the format and containing the information set out in Schedule 23 is made available to dealers for each refrigerating appliance with a direct sales function model;
- (h) an electronic product information sheet, as set out in Schedule 24, is made available to dealers for each refrigerating appliance with a direct sales function model;
- (i) customers are able to access the product information sheet in accordance with Schedules 26 and 27.

⁽¹⁾ See Article 2(14) of the Framework Regulation, as amended by [S.I. 2019/539](#), for the meaning of “supplier”.

Status: This is the original version (as it was originally made). This item of legislation is currently only available in its original format.

(2) The energy efficiency class must be based on the energy efficiency index calculated in accordance with Schedule 22.
