

SCHEDULES

SCHEDULE 11

Verification procedure for market surveillance purposes
- household washing machines and washer-dryers

Verification procedure

6. Where a model has been designed to be able to detect it is being tested (for example by recognising test conditions or test cycles), and to react specifically by automatically altering its performance during the test with the objective of reaching a more favourable level for any of the parameters specified in these Regulations or included in the technical documentation or included in any of the documentation provided, the model and all equivalent models do not conform to these Regulations.
