

## SCHEDULE 4

Requirements and matters to be addressed by safety management systems

2. A safety management system must—
  - (a) be proportionate to the hazards, licensed activities and complexity of the licensee's organisation,
  - (b) be based on an assessment of the risks,
  - (c) include within its scope the general management system, including the organisational structure, responsibilities, practices, procedures, processes and resources for determining and implementing the licensee's spaceflight safety policy, and
  - (d) be coordinated with the safety management system of any other licensee or other organisation with whom the licensee must interact during the provision of its licensed activities.
