**2023 No. 873**

The Electricity and Gas (Energy  
Company Obligation) Order 2023

PART 7

Scores

**Calculating the score for ECO4A qualifying actions**

**30.**—(1) The score to be given to an ECO4A qualifying action is to be calculated in accordance with the following formula—

$$KM \times (1 + IM + R)$$

(2) In paragraph (1)—

- (a) “KM” is the annual cost savings of the ECO4A qualifying action determined in accordance with the methodology published by the Administrator under article 32;
- (b) “IM” has the value determined in accordance with article 31;
- (c) “R” is—
  - (i) 0.2, where the ECO4A qualifying action is—
    - (aa) a low-income qualifying action; and
    - (bb) installed at off-gas premises in a rural area in Scotland or Wales;
  - (ii) otherwise, 0.

(3) In this article, “off-gas premises” and “rural area” have the meanings given in article 2(1) of the 2022 Order.
