71.—(1) Nothing in these Regulations is to be taken as requiring any person to produce any documents or records if he or she would be entitled to refuse to produce those documents or records in any proceedings in any court on the grounds that they are the subject of legal professional privilege, or as authorising any person to take possession of any documents or records which are in the possession of a person who would be so entitled.

(2) Except as provided in paragraph (3), nothing in these Regulations may be construed as requiring a person to answer any question or give any information if to do so would incriminate that person or that person's spouse.

(3) A person must comply with a request from the Agency to give information pursuant to regulation 55(2), notwithstanding that to do so may incriminate that person or that person's spouse, but information given in response to such a request may not be given in evidence in any criminal proceedings against that person or that person's spouse.

Revocations and savings

72.—(1) Subject to the following paragraphs, the 1996 Regulations are revoked.

(2) Where a consignment has been removed from premises before these Regulations come into force, and a consignment note has been raised in relation to that consignment under the 1996 Regulations, then—

- (a) for a period of 72 hours after these Regulations come into force entirely—
 - (i) the 1996 Regulations continue to apply in all other respects to that consignment;

- (b) thereafter—
 - (i) these Regulations apply to that consignment except that the requirement to make a consignee quarterly return in relation to that consignment pursuant to regulation 53 does not arise; and
 - (ii) the requirement on the consignee to send a copy of the consignment note sent to the Agency continues to apply in relation to any consignment sent pursuant to the 1996 Regulations.

ANNEX III OF THE HAZARDOUS WASTE DIRECTIVE

“ANNEX III

PROPERTIES OF WASTES WHICH RENDER THEM HAZARDOUS

H1	“Explosive”: substances and preparations which may explode under the effect of flame or which are more sensitive to shocks or friction than dinitrobenzene.
H2	“Oxidizing”: substances and preparations which exhibit highly exothermic reactions when in contact with other substances, particularly flammable substances.
H3-A	“Highly flammable”: — liquid substances and preparations having a flash point below 21 °C (including extremely flammable liquids), or — substances and preparations which may become hot and finally catch fire in contact with air at ambient temperature without any application of energy, or — solid substances and preparations which may readily catch fire after brief contact with a source of ignition and which continue to burn or to be consumed after removal of the source of ignition, or — gaseous substances and preparations which are flammable in air at normal pressure, or — substances and preparations which, in contact with water or damp air, evolve highly flammable gases in dangerous quantities.
H3-B and	“Flammable”: liquid substances and preparations having a flash point equal to or greater than 21 °C less than or equal to 55 °C.
H4	“Irritant”: non-corrosive substances and preparations which, through immediate, prolonged or repeated contact with the skin or mucous membrane, can cause inflammation.
H5	“harmful”: substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may involve limited health risks.

Status: Point in time view as at 06/04/2010.

Changes to legislation: There are currently no known outstanding effects for the The Hazardous Waste (Wales) Regulations 2005. (See end of Document for details)

H6	“Toxic”: substances and preparations (including very toxic substances and preparations) which, if they are inhaled or ingested or if they penetrate the skin, may involve serious, acute or chronic health risks and even death.
H7	“Carcinogenic”: substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce cancer or increase its incidence.
H8	“Corrosive”: substances and preparations which may destroy living tissue on contacts.
H9	“Infectious”: substances containing viable micro-organisms or their toxins which are known or reliably believed to cause disease in man or other living organisms.
H10	“Teratogenic”: substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce non-hereditary congenital malformations or increase their incidence.
H11	“Mutagenic”: substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce hereditary genetic defects or increase their incidence.
H12	Substances and preparations which release toxic or very toxic gases in contact with water, air or an acid.
H13	Substances and preparations capable by any means, after disposal, of yielding another substance, e.g. a leachate, which possesses any of the characteristics listed above.
H14	“Ecotoxic”: substances and preparations which present or may present immediate or delayed risks for one or more sectors of the environment.

Notes

1. Attribution of the hazard properties “toxic” (and “very toxic”), “harmful”, “corrosive” and “irritant” is made on the basis of the criteria laid down by Annex VI, part I A and part II B, of Council Directive [67/548/EEC](#) of 27 June 1967 of the approximation of laws, regulations and administrative provisions relating to the classification, packaging and labelling of dangerous substances ^{M23}, in the version as amended by Council Directive [79/831/EEC](#) ^{M24}.

2. With regard to attribution of the properties “carcinogenic”, “teratogenic” and “mutagenic”, and reflecting the most recent findings, additional criteria are contained in the Guide to the classification and labelling of dangerous substances and preparations of Annex VI (part II D) to Directive 67/548/EEC in the version as amended by Commission Directive 83/467/EEC^{M25}.

Test methods

The test methods serve to give specific meaning to the definitions given in Annex III.

The methods to be used are those described in Annex V to Directive 67/548/EEC, in the version as amended by Commission Directive 84/449/EEC^{M26}, or by subsequent Commission Directives adapting Directive 67/548/EEC to technical progress. Regulation 46

UK CROSS-BORDER MOVEMENT OF HAZARDOUS WASTE

Recognition of cross border UK consignment notes

1. Subject to paragraph 4 and paragraph 7, where hazardous waste is removed from premises situated in England, Scotland, Northern Ireland or Gibraltar and is transported into Wales (“a cross-border consignment note into Wales”), no requirement for a consignment note to accompany the waste under Part 6 applies if—

- (a) a consignment note which is completed in England, Scotland, Northern Ireland or Gibraltar accompanies the waste; and
- (b) the note contains the information required by the standard consignment note set out in the Annex to Commission Decision 94/774 of 24 November 1994 ^{M27} (“a cross-border consignment note”).

Marginal Citations

M27 [S.I. 2003/1941](#).

2. Any requirement in Part 6 to complete a consignment note for a cross-border consignment may be satisfied by including the information—

- (a) on the cross-border consignment note; or
- (b) where that is not possible, on a separate form prepared for that purpose.

3. Any requirement to keep a copy of a consignment note for a cross-border consignment or to give a copy of the note to another person may be satisfied by keeping a copy of the cross-border consignment note or giving a copy of the note to that person.

UK cross-border Consignments into Wales

4.—(1) If a cross-border consignment into Wales is rejected wholly or in part, the consignee must—

- (a) indicate on the cross-border consignment note (if he or she has received one) or otherwise provide a written record of his or her rejection of the consignment (or part of it) and the reasons for such rejection;
- (b) retain a copy of the note or record;
- (c) give a copy to the carrier; and
- (d) as soon as reasonably practicable, send a copy to the consignor, and (if different from the consignor) the producer or holder indicated on the cross-border consignment note.

(2) On being informed that the consignee will not accept delivery of a cross-border consignment into Wales or part, the carrier must—

- (a) inform the Agency; and
- (b) seek instructions from the hazardous waste producer or holder indicated on the cross-border consignment note and take all reasonable steps to ensure they are fulfilled.

(3) Before a rejected cross-border consignment into Wales is moved from the original delivery destination, the carrier must ensure that—

- (a) a consignment note is completed in accordance with regulation 43 or 44; and

Status: Point in time view as at 06/04/2010.

Changes to legislation: There are currently no known outstanding effects for the *The Hazardous Waste (Wales) Regulations 2005*. (See end of Document for details)

- (b) a copy of the note is sent to SEPA (where the waste is transported from Scotland) or the Northern Ireland Department of the Environment (where the waste is transported from Northern Ireland).

(4) Where a cross-border consignment into Wales from Scotland or Northern Ireland is accepted, the consignee must send a copy of the cross-border consignment note to SEPA (where the waste is transported from Scotland) or the Northern Ireland Department of the Environment (where the waste is transported from Northern Ireland).

UK cross-border Consignments out of Wales

5.—(1) Where a cross-border consignment out of Wales is consigned to premises in Scotland or Northern Ireland, the following requirements apply in addition to those in Part 6.

(2) Before the hazardous waste is removed—

- (a) the hazardous waste producer, or holder, as the case may be, or (in the case of a multiple collection of hazardous waste) the carrier, must ensure that—

- (i) a copy of the relevant consignment note is prepared for SEPA (where the waste is to be consigned to a consignee in Scotland), or for the Northern Ireland Department of the Environment (where the waste is to be consigned to a consignee in Northern Ireland); and

- (ii) an additional copy is provided for the consignee.

- (b) the copies of the relevant consignment note prepared pursuant to paragraph (a) must be completed in accordance with Part 6; and

- (c) the consignor (or the producer or holder, as the case may be) or, in the case of a multiple collection of hazardous waste, the carrier, must send the copy of the note prepared pursuant to paragraph (a)(i) to the relevant authority at least 72 hours before removal of the consignment or if that is not possible, as soon as reasonably practicable thereafter.

(3) The carrier must ensure the additional copy of the note prepared for consignee travels with the consignment and is given to the consignee on delivery of the consignment.

Multiple Collections in Wales and England

PROVISIONS OF THESE REGULATIONS

1.—(1) This paragraph applies to any notification of premises made for the purposes of these Regulations from the day after the day on which they are made and before 16 July 2005.

(2) Where it is proposed to remove waste from any premises after 16 July 2005, a producer, and, in the circumstances provided for in regulation 25, a consignor, may notify premises to the Agency in advance in accordance with regulation 26.

(3) The effective time may not be on a date earlier than 16 July 2005 or on a date later than 16 September 2005.

(4) The Agency must, where notification is duly given pursuant to this paragraph, issue a premises code in accordance with regulation 27.

(5) Expressions used in this paragraph have the same meanings as in Part 5.

2.—(1) This paragraph applies to any action taken by a producer or consignor before this paragraph comes into force but which would, if taken after it comes into force, have been a notification which complied with regulation 26, (“a pre-notification”).

(2) A pre-notification is to be regarded as notification given upon the coming into force of this paragraph.

(3) Regulation 28(1) does not apply to a notification arising out of a pre-notification and that notification takes effect, instead:

- (a) where the person who gave the pre-notification requested a date for commencement, at the beginning of the date so requested;
- (b) where no such request was made, at the beginning of the fourth day following the day on which the pre-notification took place;
- (c) when payment of the relevant fee is received by the Agency;
- (d) upon the coming into force of this paragraph;

whichever is the later.

Status: Point in time view as at 06/04/2010.

Changes to legislation: There are currently no known outstanding effects for the The Hazardous Waste (Wales) Regulations 2005. (See end of Document for details)

(4) Where the Agency issues a premises code in respect of premises which are the subject of a pre-notification given pursuant to this paragraph, that code is to be regarded as having been issued on the coming into force of this paragraph.

(5) Where the relevant fee is paid to the Agency in respect of a pre-notification, that fee is to be regarded as having been paid for the purposes of regulation 26(7) on the coming into force of this paragraph.

3. Where the removal of waste by pipeline from any premises commenced before 16 July 2005 but continues thereafter, regulation 41 has effect as if the first day on which the waste was piped was 16 July 2005.

PART 2

PERMITTING REGIMES

4.—(1) Subject to the following provisions of this Schedule, a reference in a waste permit to special waste, or to special waste of any description (howsoever framed), is a reference to hazardous waste, or hazardous waste of that description, as the case may be.

5.—(1) This paragraph applies in relation to waste which was not special waste immediately before these Regulations come into force if that waste becomes hazardous waste as a result of these Regulations (“changed status waste”).

(2) Any general prohibition or restriction contained in a waste permit relating to the disposal or recovery of special waste under that permit immediately before these Regulations came into force does not apply to the disposal or recovery of changed status waste insofar as the permit specifically authorises the disposal or recovery of that type of waste.

(3) A waste permit holder who would no longer be authorised to continue to dispose or recover that waste under his or her permit by reason of the change in its status, may continue to dispose or recover that waste in accordance with the permit despite the change in status until the prescribed date.

(4) Regulation 17(3) of the 1994 Regulations does not apply to the carrying on of an exempt activity involving changed status waste at any place by a person who was carrying on that activity at that place immediately before these Regulations come into force (“a changed status waste exempt person”).

(5) A changed status waste exempt person who would no longer be authorised to carry on an exempt activity involving such waste by reason of the change in its status, may continue to carry on that activity at that place in accordance with the 1994 Regulations despite the change in status until the prescribed date.

(6) The prescribed date is—

- (a) where an application for a waste permit or a variation to a permit is duly made in relation to the activity before 16 July 2006, the date on which the application is granted or if the application is (or is deemed to be) rejected, the date on which the period for appealing expires without an appeal being made or any appeal is withdrawn or finally determined; or
- (b) in any other case, 16 July 2006.

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations set out the regime for the control and tracking of the movement of hazardous waste for the purpose of implementing the Hazardous Waste Directive (Directive [91/689/EC](#)). The Regulations apply in relation to Wales.

Hazardous Waste

The Waste Framework Directive (Directive [75/442/EEC](#)) regulates, subject to certain exclusions, the management of all types of waste (“Directive waste”). The Hazardous Waste Directive supplements the Waste Framework Directive by imposing additional requirements in relation to Directive waste which displays certain hazardous properties. These requirements have previously been transposed by the Special Waste Regulations 1996, through controls on “special waste”. These Regulations repeal the Special Waste Regulations 1996 and replace the term “special waste” with “hazardous waste”. Parts 1 to 3 of the Regulations define hazardous waste and set out how the Regulations apply to that waste. The definition of hazardous waste in regulation 6 refers to the list of hazardous wastes set out in the List of Wastes (Wales) Regulations 2005 (S.I.2005/1820 (W.148)) which are made on the same date as these Regulations.

There is an exclusion from these controls for domestic waste which displays hazardous properties but not if it comprises asbestos waste or is collected separately. In both cases, the regulations do not impose obligations directly on householders.

Mixing Ban

Part 4 bans the mixing of hazardous waste unless it is permitted as part of a disposal or recovery operation in accordance with the Waste Framework Directive. It also imposes a duty to separate different categories of Hazardous Waste where technically feasible.

Notification

Part 5 makes it an offence to remove hazardous waste from premises which have not been notified to the Environment Agency, unless they are exempt premises or the waste has been flytipped. All premises at which hazardous waste is produced or removed must be notified by the producer of the waste or the consignor (the person who arranges for the removal of the waste). Notification lasts 12 months after which the premises must be notified again. A fee is payable to the Environment Agency on notification of premises.

Movement of Hazardous Waste

Part 6 requires documents to be completed whenever hazardous waste is removed from premises (which includes removal from ships and removal by pipeline). The various types of form are set out in Schedules 4 to 6. This is to ensure that an accurate description of consignments of waste accompanies them whenever they move. This is in addition to any requirements to ensure hazardous waste is properly packaged and labelled (see in particular the Packaging (Essential Requirements) Regulations 2003 (S.I. 2003/1941)).

Producers, holders, carriers, consignors and consignees are all required to complete various parts of the forms. If the consignee rejects the waste, suitable alternative arrangements must be made.

Schedule 7 deals with cross border transfers within the United Kingdom and Gibraltar.

Status: Point in time view as at 06/04/2010.

Changes to legislation: There are currently no known outstanding effects for the *The Hazardous Waste (Wales) Regulations 2005*. (See end of Document for details)

Records and Returns

Part 7 requires producers, holders, carriers, consignors and consignees to keep records. These must be kept for a minimum of 3 years except in the case of carriers where the period is 12 months. Consignees are required to provide the Environment Agency with a quarterly return setting out the consignments they have received during that period. Consignees may be required to pay a fee to the Environment Agency but are given a right to recover from consignors who sent the waste to them. They are also required to send a return to producers or holders who sent waste to them. Schedule 9 sets out a transitional scheme for fees.

The Agency's functions

Part 8 sets out the Agency's functions. In particular, the Agency is required to inspect producers of hazardous waste periodically and to keep any records sent to it pursuant to Part 7 for a minimum of 3 years.

Emergencies and Grave Danger

Part 9 imposes duties on holders of hazardous waste and the Environment Agency in the event of an emergency or grave danger which arises from hazardous waste.

Enforcement

Part 10 makes it an offence for failure to comply with the requirements of these Regulations. The maximum penalty for failure to comply with a requirement imposed by or under the regulations set out in regulation 69(1) is level 5 on the standard scale (currently £5000). The Agency may issue fixed penalty notices of £300 instead of seeking conviction in relation to such offences. Other offences under the Regulations (including the provision of false information) are subject to a maximum fine of level 5 if tried summarily and higher fines and also imprisonment if tried on indictment.

Amendments to other legislation

Schedule 11 makes consequential amendments to legislation so that references to special waste are omitted and references to hazardous waste are updated so that they are consistent with these Regulations.

Transitional provision

Schedule 12 makes transitional provision. It provides for notification in advance of the regulations fully coming into force. It also makes transitional provision for those cases where the change to hazardous waste from special waste would mean that a person would no longer be authorised to dispose or recover waste.
