

SCHEDULE

Calculation of the value of a non-bovine animal slaughtered for tuberculosis

Calculation

1. The value of a non-bovine animal slaughtered for tuberculosis is to be calculated using the following formula—

$$A - B = C$$

Where—

A is the set figure for each species and category of non-bovine animal provided by the table;

B is the figure provided by one of paragraphs 2 to 5; and

C is the value of the non-bovine animal for the purposes of article 20.

Table

<i>Species</i>	<i>Category</i>	<i>Set figure</i>
(1) Deer		£400.00
(2) Goat	(a) (a) aged not more than 1 year;	(a) (a) £80.00
	(b) (b) non-breeding animal aged more than 1 year;	(b) (b) £160.00
	(c) (c) breeding female;	(c) (c) £250.00
	(d) (d) stud male aged more than 1 year;	(d) (d) £350.00
(3) Alpacca, guanaco, llama and vicuna	(a) (a) aged not more than 18 months;	(a) (a) £750.00
	(b) (b) non-breeding animal aged more than 18 months	(b) (b) £750.00
	(c) (c) breeding female aged more than 18 months;	(c) (c) £1500.00
	(d) (d) stud male aged more than 18 months;	(d) (d) £1500.00
