2013 No. 2506

The Nitrate Pollution Prevention (Wales) Regulations 2013

PART 5

Controlling the spreading of nitrogen fertiliser

Controlling how nitrogen fertiliser is spread

23.—(1) Subject to paragraph (2), any person spreading slurry must use spreading equipment with a low spreading trajectory, that is, below 4 metres from the ground.

(2) Spreading equipment with a spreading trajectory of more than 4 metres from the ground can be used on land that has a low run off risk where such equipment can achieve an average slurry application rate of not more than 2 millimetres per hour when it is operating continuously.

(3) Any person spreading nitrogen fertiliser must do so in as accurate a manner as possible.
