**2021 No. 77**

The Water Resources (Control of Agricultural  
Pollution) (Wales) Regulations 2021

PART 6

Storage of organic manure and silage

**Temporary field sites**

- 27.—(1) A temporary field site must not be—
- (a) in a field liable to flooding or becoming waterlogged,
  - (b) within 50 metres of a borehole, spring or well or within 10 metres of surface water or a land drain (other than a sealed impermeable pipe),
  - (c) located in any single position for more than 12 consecutive months, or
  - (d) located in the same place as an earlier one constructed within the last two years.
- (2) Solid poultry manure that does not have bedding mixed into it and is stored on a temporary field site must be covered with an impermeable material.
- (3) Further—
- (a) topsoil must not be removed from the ground upon which a temporary field site is to be constructed,
  - (b) a temporary field site must not be located within 30 metres of a watercourse on land identified on the risk map as having an incline of greater than 12°, and
  - (c) the surface area of a temporary field site must be as small as reasonably practicable to minimise the leaching effect of rainfall.
