8. Revocations
9. Transitional provisions: *Saccharomyces cerevisiae* CNCM I-4407 (formerly *Saccharomyces cerevisiae* NCYC Sc 47) (identification number 4b1702)
10. Transitional provisions: *Bacillus velezensis* ATCC PTA-6737 (formerly *Bacillus subtilis* ATCC PTA-6737) (identification number 4b1823)
11. Transitional provision: Decoquinate (Deccox[®]) (identification number 51756i (formerly E756))
Signature

SCHEDULE
1 Authorisation of a preparation of manganese chelate of lysine and glutamic acid (identification number 3b509) as a feed additive for all animal species

Changes to legislation: There are currently no known outstanding effects for the The Feed Additives (Authorisations) (Wales) Regulations 2022. (See end of Document for details)

SCHEDULE 2	Authorisation of a preparation of <i>Lactobacillus buchneri</i> DSM 29026 (identification number 1k20759) as a feed additive for all animal species
SCHEDULE 3	Authorisation of a preparation of serine protease (EC 3.4.21.-) produced by <i>Bacillus licheniformis</i> DSM 19670 (identification number 4a13) as a feed additive for chickens for fattening
SCHEDULE 4	Renewal of authorisation of pyridoxine hydrochloride (vitamin B ₆) (identification number 3a831) as a feed additive for all animal species
SCHEDULE 5	Renewal of authorisation of a preparation of <i>Saccharomyces cerevisiae</i> CNCM I-4407 (formerly <i>Saccharomyces cerevisiae</i> NCYC Sc 47) (identification number 4b1702) as a feed additive for calves for rearing
SCHEDULE 6	Renewal of authorisation (with modification) of a preparation of <i>Bacillus velezensis</i> ATCC PTA-6737 (formerly <i>Bacillus Subtilis</i> ATCC PTA-6737) (identification number 4b1823) as a feed additive for chickens for fattening, chickens reared for laying, ducks for fattening, quails, pheasants, partridges, guinea fowl, pigeons, geese for fattening and ostriches, and its authorisation as a feed additive extending existing uses to cover all minor poultry species (except for laying), ornamental birds, sporting birds and game birds
SCHEDULE 7	Authorisation of a preparation of <i>Bacillus licheniformis</i> DSM 28710 (identification number 4b1828) as a feed additive for laying hens, minor poultry species for laying, poultry species for breeding and ornamental birds
SCHEDULE 8	Renewal of authorisation of a preparation of <i>Clostridium butyricum</i> FERM BP-2789 (identification number 4b1830) as a feed additive for chickens reared for laying, turkeys for fattening, turkeys reared for breeding, minor avian species (excluding laying birds), weaned piglets and weaned minor porcine species, and its authorisation as a feed additive for chickens for fattening, suckling piglets and suckling minor porcine species
SCHEDULE 9	Authorisation of a preparation of 6-phytase (EC 3.1.3.26) (identification number 4a32) as a feed additive for all poultry species, ornamental birds, piglets, pigs for fattening, sows, minor porcine species for fattening or reproduction
SCHEDULE 10	Authorisation of decoquinate (Deccox [®]) (identification number 51756i) as a feed additive for chickens for fattening
SCHEDULE 11	Authorisation of decoquinate (Avi-Deccox [®] 60G) (identification number 51756ii) as a feed additive for chickens for fattening
SCHEDULE 12	Revocation of retained direct EU legislation
	Explanatory Note

Changes to legislation:

There are currently no known outstanding effects for the The Feed Additives (Authorisations) (Wales) Regulations 2022.
